December 1991

Introduction

This report is a collection of the most commonly requested economic and demographic information about Utah. The Utah Office of Planning and Budget has updated this report five times, each time adding figures for an additional year. Data are presented for the state, for multi-county districts (MCD), and for individual counties. The purpose of this report is to provide the public and private sector with a time series of economic and demographic data to use in making wise decisions.

Statistical figures for employment in non-agricultural industries are subdivided into eight classifications:

Manufacturing
Mining
Contract Construction
Transportation, Communications, & Public Utilities
Trade (Wholesale and Retail)
Finance, Insurance, & Real Estate
Government
Services

The data for these profiles come from many sources. The population data come from the Utah Population Estimates Committee. Employment and recent personal income data are from the Utah Department of Employment Security. The primary source for personal income data, however, is the U.S. Bureau of Economic Analysis. Both assessed valuations and gross taxable sales are from the Utah State Tax Commission; birth and death data come from the Utah Department of Health.

It should be noted that the population estimates for years 1981-1989 reflect recent revisions by the Population Estimates Committee based on the 1990 Census. These revised estimates have not been previously published. The 1990 population estimate is a July 1 estimate to be consistent with the historical period and will be slightly larger than the actual count recorded at the time of the April 1 Census.

The Utah Office of Planning and Budget has attempted to incorporate all revisions of historical data and correct all known data problems in this report. As with any statistical compendium, however, there is always the potential for error. The Utah Office of Planning and Budget welcomes comments and corrections.

These profiles are also available in a machine-readable format. Any questions or comments about this report should be directed to the Demographic and Economic Analysis section, Utah Office of Planning and Budget, (801) 538-1036.
